Art Unit: 3738

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a device for altering a surface, classified in class 425, subclass 383+.
- II. Claims 17-22, drawn to a method of altering a surface, classified in class 264, subclass 239+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). In this case, the process as set forth in claim 17 can be practiced by a materially different apparatus such as a mandrel system that does not include the incremental rotation feature of claim 1, and the apparatus as claimed can be used to practice another and materially different process such as one which does not collapse the prosthesis for loading into a delivery sheath but rather directly inserts the prosthesis into a lumen so as to provide uniform support for said lumen.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent required searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
